

JavaScript Technical Task

Multiple Color Image:

1. Create Two containers, one for main image(feature image) and another for all other images(thumbnails);
 2. Create 4 Button, Labeled as All, Red, Green, & Blue.
 3. Bind Event on button click to show their respective color images only.
 - By Default All Images visible
 - On Green button Click, show green images only and select first thumb image as feature image(main image).
 - similarly on any Button click show their respective images only.
 4. Create One Dropdown Element, on selected value change Do the same process(as in step-3).
 5. Do some required Styling to make it look good and compact. (Style using javascript only and give basic styling to the containers)
 6. OnThumbnail Images Click of any Color, change the Feature (i.e Main) Image.
- * for creating any HTML Element/Styling use **JAVASCRIPT** only.
- ** Demo GIF is attached with the task
